CTO - Workshop

Program overview:

This workshop is designed for physicians interested in learning about the latest devices that help in crossing chronic total occlusions.

Physicians will also have the opportunity to learn about the latest in endovascular techniques for treating peripheral arterial diseases associated with the lower limbs (Iliacs, femoropopliteal and infrapopliteal lesions)

Course Objective

The objective of these workshops is to promote the best endovascular practices in crossing chronic total occlusions associated with the lower limbs. It also responds to the increasing need for further education in this area.

Audience

Participants for the workshop can be Interventional radiologists, vascular surgeons, interventional cardiologists, angiologists and must possess basic endovascular skills and knowledge of peripheral arterial diseases

Ideal group size of this meeting is 12 participants

Duration

The scheduled program is a two-day meeting. Arrival in the evening prior to the meeting may be required depending on travel arrangements.

Course Director: Prof. Dr. Dierk Scheinert

Location: Leipzig, Germany
